- Right across from Boulder Point Golf Club

One of the South Metro's most sought after communities for it's physical beauty, Pete's Hill! This community is just 30 miles south of downtown Minneapolis and within the highly sought after Lakeville School District. Take advantage of the natural privacy offered by this woodsy location boasting unobstructed views from the highest point in Scott County – it's enough to consider it a dream community. We are partnered with custom home builder Johnson-Reiland. Simply put, they build accessible custom homes

that champion universal design. When you think of an accessible home you might envision winding ramps and institutional, impersonal looking designs that seem incongruous with a home someone can love and enjoy. That's where Johnson-Reiland does it differently – they create homes using Universal Design. At its core, universal design is just like any other design problem out there, but results in a more beautiful, creative and uplifting home to age in place. Schedule a tour of one of their homes today.
